Dear Frank,
Thanks for your email. The diameter of one wire is 0.71mm and we want to splice two wires. So in total the diameter of two wires is 1.42mm. I can send you the wires by courier.
thanks.
kind regards,
hammad

Dear Hammad,

thank you very much for your inquiry.

For a quotation of the version with copper inside we need to know the exact diameter of the copper

wire. Maybe we have to choose another construction when the copper is too thick.

In general it would be possible to splice a loop in the end with stress relieved copper coming out at the middle of the loop.

Please advise the required diameter of the line, because in your former email you mentioned 2 mm and in the past 3mm.

With best regards
Frank Gottesmann

Dear Frank,

I need to ask you two things:

1. Can you please send me the quotations for 2mm 100m sleeve.
2. As we discussed over the phone can you also send me the quotation for making 100 m line with copper inside. If I send you the copper wire by courier how will long will it to manufacture it. Is it possible before your closing for summer holidays.
3. Can you make a loop at one end of the line as approximately shown in the figure and the copper wire coming out stress relieved. By doing this we can easily attached the line to aircraft without losing a lot of strength in the line.

thanks,
kind regards,
Hammad

Dear Mr. Hammad,

we did a lot of braiding with wire core so far.

Please let us know a little bit more details about the required properties of the cable.

We are looking forward to your answer that we will be able to send you our offer.

With best regards
Frank Gottesmann

Betreff:	100 Meters of 3mm D-Pro for the Leuven Kite Energy Research Group

Dear Mr. Gottesmann,

The Katholic University of Leuven has asked us for a good line to use for their Kite Energy demonstrator (a 2m span plane on a 60 meter cable).

They need to splice a copper cable inside, so I have advised to take a 3mm D-Pro line; as that is still practical to splice and is still thin enough for the plane to be able to fly.

I have added Dr. Hammad Ahmad in CC, he is the responsible in the University for this cable development. Would it be possible to get him a quotation for this ?

Thank you very much in advance !

Reinhart
